Featured speakers (in order of participation) include:

Prof. Martin Rees

University of Cambridge, UK. Co-founder of the Centre for the Study of Existential Risks, Emeritus Professor of Cosmology and Astrophysics, former President of the Royal Society, fellow of Trinity College

Prof. Yosuke Yamashiki

GSAIS, Kyoto University

Prof. Hiroaki Isobe

GSAIS, Kyoto University

Prof. James Mori

Disaster Prevention Research Institute (DPRI), Kyoto University

Prof. Satoshi Koyama

Graduate School of Letters, Kyoto University

Prof. Masao Mitsuyama

GSAIS, Kyoto University

Prof. Stefan Trueck

Centre for Financial Risk, Macquarie University, Australia

Prof. Kazuhiko Ohashi

Graduate School of International Corporate Strategy (ICS), Hitotsubashi University

The main goals of the symposium

The organizer of the symposium GSAIS/ Shishukan aims to provide a fresh look at the global challenges facing humanity in areas such as energy, water, food, population, diseases, etc. This year's international symposium will focus on unexpected extreme disasters and more specifically, on how to enhance our resilience to such disasters. Another goal of the symposium is to develop a holistic approach that integrates various research fields by considering the past, present and future dimensions. The symposium will bring together scholars from natural and social sciences, as well as humanities. The idea behind this is that we need to go beyond the "silo-based" approach, where handling disasters is something left to experts with specialized knowledge.
