京都大学への留学案内
ADMISSIONS GUIDE
for INTERNATIONAL APPLICANTS

2020-2021
Kyoto University is one of the world’s foremost research institutions, attracting outstanding researchers and students in diverse disciplines from all over the world. By providing state-of-the-art facilities and a rich, stimulating academic environment, Kyoto University enables its researchers to fully develop and grow as scholars, and supports the development of innovative cutting-edge research projects.

Founded in June 1897, Kyoto University has a long history and enduring traditions. The main campus is located in the historic city of Kyoto, a center of traditional Japanese culture. Since its founding, the University has been dedicated to furthering higher education and fostering an atmosphere of free academic exchange. Graduates of the University play important roles in both national and international affairs, as key players in politics, industry, and society.

At present, Kyoto University is comprised of 10 faculties, 18 graduate schools, 13 research institutes, 23 educational institutes and other establishments. Approximately 2,700 of the university’s 23,000 students hail from overseas. With students from approximately 110 different countries and regions, the university’s campuses boast a rich cultural diversity.

Kyoto University offers a diverse range of exceptional education programs designed to guide students towards realizing their full potential. Students benefit from the university’s rich academic environment, expert guidance, and a diverse range of experiences that only Kyoto University can provide. The programs are complimented by comprehensive student support services and a wide range of extracurricular and club activities to provide a rounded fulfilling experience of student life.

Kyoto City is affectionately referred to as the “heart and soul” of Japan. A culturally rich city with 1,200 years of history, it has long been the nation’s center of art, culture, and scholarship. Many of the city’s historic locations, including several of its approximately 2,000 shrines and temples, have been classified as UNESCO World Heritage Sites. In Kyoto, ancient culture and tradition coexist side by side with technological innovation and entrepreneurship. The city is home to several major technology companies, many of which cooperative links with Kyoto University. In Kyoto, students and researchers have the choice of engaging with its vibrant cultural milieu, or relaxing amidst its tranquil natural scenery - the perfect setting for a rich academic life.

Kyoto University is one of the most renowned research-oriented universities in Asia. A reputation testified by the accolades conferred on its alumni and researchers, including recipients of the Fields Medal, Gauss Prize, Lasker Award, and nine Nobel laureates. Notable Nobel laureates include Dr. Hideki Yukawa (1949, physics), Japan’s first Nobel laureate, Dr. Shinya Yamanaka (2012, physiology or medicine), the pioneering stem cell researcher, Dr. Tatsuku Honjo (2018, physiology or medicine), for the discovery of cancer therapy by inhibition of negative immune regulation, and Dr. Akira Yoshino (2019, Science), for the invention of Lithium ion battery.

Four Major Strengths of Kyoto University

1. **Cutting-Edge Research Hub**
   Kyoto University is one of the world’s foremost research institutions, attracting outstanding researchers and students in diverse disciplines from all over the world. By providing state-of-the-art facilities and a rich, stimulating academic environment, Kyoto University enables its researchers to fully develop and grow as scholars, and supports the development of innovative cutting-edge research projects.

2. **World-Class Education Programs**
   Kyoto University offers a diverse range of exceptional education programs designed to guide students towards realizing their full potential. Students benefit from the university’s rich academic environment, expert guidance, and a diverse range of experiences that only Kyoto University can provide. The programs are complimented by comprehensive student support services and a wide range of extracurricular and club activities to provide a rounded fulfilling experience of student life.

3. **Study in Kyoto-Japan’s Heartland of Culture and Learning**
   Kyoto City is affectionately referred to as the “heart and soul” of Japan. A culturally rich city with 1,200 years of history, it has long been the nation’s center of art, culture, and scholarship. Many of the city’s historic locations, including several of its approximately 2,000 shrines and temples, have been classified as UNESCO World Heritage Sites. In Kyoto, ancient culture and tradition coexist side by side with technological innovation and entrepreneurship. The city is home to several major technology companies, many of which cooperative links with Kyoto University. In Kyoto, students and researchers have the choice of engaging with its vibrant cultural milieu, or relaxing amidst its tranquil natural scenery - the perfect setting for a rich academic life.

4. **Award-Winning Research**
   Kyoto University is one of the most renowned research-oriented universities in Asia. A reputation testified by the accolades conferred on its alumni and researchers, including recipients of the Fields Medal, Gauss Prize, Lasker Award, and nine Nobel laureates. Notable Nobel laureates include Dr. Hideki Yukawa (1949, physics), Japan’s first Nobel laureate, Dr. Shinya Yamanaka (2012, physiology or medicine), the pioneering stem cell researcher, Dr. Tatsuku Honjo (2018, physiology or medicine), for the discovery of cancer therapy by inhibition of negative immune regulation, and Dr. Akira Yoshino (2019, Science), for the invention of Lithium ion battery.

**Bachelor Degree Programs [Regular Students]**

This section provides general information on admission requirements and the procedures for international applicants to become privately financed undergraduate students* at Kyoto University. For details of particular programs, admission requirements, selection and the awarding of degrees etc., please contact the relevant administration offices.

Those who wish to enroll as non-regular (non-degree seeking) students (e.g. research students and exchange students) should refer to the "Non-Regular Students" section on page 17-18.

An English-taught degree program for undergraduate students began in the Undergraduate School of Global Engineering, the Faculty of Engineering in 2011 (ref. P.11-12).

* If you wish to enter Kyoto University on a Japanese Government (Monbukagakusho: MEXT) Scholarship, please refer to page 19-20.

### Language of Instruction

For international students, classes other than those of English-Taught Degree Programs (ref. P.11-16) are generally taught in Japanese, unless specified otherwise. Those who wish to enroll in an undergraduate degree program, a master’s degree program, or a professional degree program must have sufficient proficiency in Japanese upon enrollment.

Kyoto University does not have an independent faculty for the study of the Japanese language. If you wish to prepare for admission to the university, please study at an appropriate Japanese language school.

### Awarding of Degrees

Bachelors’ degrees are awarded to those who have attended the University for four or more years, and satisfied the course and credit requirements of an undergraduate program.

The minimum number of years required to earn a degree is four, except at the Faculty of Medicine’s Department of Medical Science and the Faculty of Pharmaceutical Sciences’ Division of Pharmacy, both of which require six or more years of attendance.
Eligibility Requirements for Applicants
Each faculty has its own admission requirements. Preliminary eligibility screening may be conducted prior to the submission of applications.
For details, please check the application guidelines provided by each faculty. The following information is a general overview of the eligibility requirements for bachelor degree programs.

- Completion of 12 years' schooling abroad, or equivalent (including those who are expected to graduate by March 31, 2021) as specified by the Minister of Education, Culture, Sports, Science and Technology,
- Equivalents recognized by the Minister of Education, Culture, Sports, Science and Technology such as the International Baccalaureate.

Selection
Standards for selection are basically the same for international applicants as for prospective Japanese applicants (General Admission). However, the Faculties of Economics, Pharmaceutical Sciences and Engineering have special selection processes for privately financed international students. The academic year begins in April.

- Special Selection for Privately Financed International Applicants
The Faculties of Economics, Pharmaceutical Sciences and Engineering have special selection processes for privately-financed international applicants. Each consists of two language-proficiency tests - EJU (the Examination for Japanese University Admission for International Students), administered by JASSO (the Japan Student Services Organization), and TOEFL (the Test of English as a Foreign Language) - and an examination given by the Faculty itself. A preliminary selection also takes place. The table below shows the schedule of entrance examinations for the 2020-2021 academic year. The schedules are subject to change. Please check the application guidelines for the details. If you have questions, please contact the relevant administrative offices.

- Special Selection for Graduates from Schools Located in Countries Other than Japan
The Faculty of Law and Economics have special admissions procedures for graduates from schools located outside Japan. The Faculty of Law accepts applications from both Japanese and foreign nationals. The Faculty of Economics accepts applications from Japanese nationals only. For details, please check the application guidelines provided by each faculty.

- Kyoto University International Undergraduate Program (Kyoto iUP)
Kyoto iUP comprises a four-year undergraduate program preceded by a six-month preparatory course. Upon graduation, students are awarded a bachelor's degree in their selected major. Japanese language proficiency is not required at the outset of the program, as Kyoto iUP students are provided with intensive Japanese language courses in the first six months and subsequent first and second year of their undergraduate study of the program.
(http://www.iup.kyoto-u.ac.jp/)

- General Admissions
Applicants must take two examinations:
① The Common Test for University Admissions, given by the National Center for University Entrance Examinations
   - The test usually held in January, please refer to: http://www.junin.ac.jp (in Japanese, external link).
② Entrance Examination given by a Faculty of Kyoto University
   - KU Faculty examinations take place in late February, with applications usually opening in late January. Please contact the University's Admissions Office for the latest schedule. (Email: nyushii@adr.adm.kyoto-u.ac.jp)

- Third Year Admission
The Faculties of Law and Economics accept international applicants in the third year of their undergraduate programs. For details, please check the application guidelines provided by the relevant faculty.

- Undergraduate Admissions for Bachelor's Degree Holders
Following faculties accept applicants as mentioned below. For details, please check the application guidelines provided by each faculty.
   - Letters, Education, Medicine (School of Human Health Sciences only):
     Accept bachelor's degree holders including those who are expected to have it by the time of their enrollment to Kyoto University.
   - Integrated Human Studies, Science, Engineering (except International Program):
     Accept Kyoto University’s graduates and those who are expected to graduate Kyoto University only.
## Master's, Doctoral and Professional Degree Programs [Regular Students]

This section provides general information regarding admission requirements and procedures for privately financed international applicants who are interested in Master’s, Doctoral or Professional Degree Programs. For details, please contact the relevant administration office (ref. P.27-28).

For those who wish to enroll as non-regular (non-degree seeking) students (e.g. research students and exchange students), please refer to the “Non-Regular Students” section on page 17-18.

For information on English-taught degree programs, please refer to page 11-16.

### Language of Instruction

Classes and examinations are generally conducted in Japanese except “English-Taught Degree Programs” (ref. P.11-16). Sufficient Japanese proficiency is necessary at the time of enrollment. Kyoto University does not have an independent faculty for Japanese studies nor Japanese language preparatory programs.
Awarding of Degrees

Master’s Degree Programs
A Master’s degree is awarded to those who successfully complete two or more years of required course work and research, and have their thesis accepted.

Professional (Master's) Degree Programs (Graduate School of Medicine, Government, and Management)
A professional (Master’s) degree is awarded to those who successfully complete two or more years of required course work.

Professional Degree Program (Law School)
A Juris Doctor (professional degree) is awarded to those who successfully complete three or more years of required course work at the Law School.

Doctoral Degree Programs
A doctoral degree is awarded to those who successfully complete three or more years of required course work and research, and have their dissertation accepted.

Four-Year Doctoral Degree Programs of the Graduate Schools of Medicine, and Pharmaceutical Sciences
A doctoral degree is awarded to those who successfully complete four or more years of required course work and research, and have their dissertation accepted.

Five-Year Doctoral Degree Programs of the Graduate Schools of Asian and African Area Studies, and Advanced Integrated Studies in Human Survivability
A doctoral degree is awarded to those who successfully complete five or more years of required course work and research, and have their dissertation accepted.

Eligibility Requirements for Applicants
Each graduate school has individual admission requirements. The following information is the main extracts of eligibilities. In addition, preliminary eligibility screening may be conducted prior to the submission of application forms. For details, please see the application guidelines posted on the website of relevant graduate school (ref. P.9-16). Any questions, please contact the relevant administration office (ref. P.27-28).

Master's Degree Programs, Professional Degree Programs, and Five-Year Doctoral Programs of the Graduate Schools of Asian and African Area Studies, and Advanced Integrated Studies in Human Survivability
- Candidates who have graduated from a Japanese university.
- Candidates who have completed 16 years of schooling outside of Japan.*
- Candidates who have reached 22 years of age or older and have been awarded a bachelor’s degree or higher, or equivalent as recognized by the graduate school to which the application is being made.

Doctoral Degree Programs
- Candidates who have been awarded a master’s degree, professional degree, or Juris doctorate degree from a university in Japan.
- Candidates who have completed a program at an overseas university that is equivalent to a master’s program or a professional degree program of Kyoto University.
- Candidates who have reached 24 years of age or older and have a master’s degree, professional degree, Juris doctorate (or higher degree), or recognized by the graduate school as such.

Four-Year Doctoral Degree Programs of the Graduate Schools of Medicine, and Pharmaceutical Sciences
- Candidates who have graduated from a six-year medicine, dentistry, veterinary medicine or pharmacy course at a Japanese university.
- Candidates who have completed 18 years of schooling outside of Japan.*
- Candidates who have reached 24 years of age or older, and have been deemed by the appropriate authorities at the Graduate School of Medicine or Pharmaceutical Sciences to have academic ability equivalent or superior to that of a graduate from a six-year medicine, dentistry, veterinary medicine or pharmacy course at a Japanese university.

* Note that candidates who have not completed 16 years of schooling outside of Japan (or 18 years for four-year doctoral degree programs) may still be eligible to apply if they meet certain requirements. For more detailed information, please read the guidelines on the graduate school website (ref. P.9-16) and contact the relevant administration offices if you have any questions or inquiries.

Application · Selection
Each graduate school has individual application deadlines and entrance examination schedules. Preliminary eligibility screening via AAO (Admissions Assistance Office) may be required prior to the submission of application documents. For details, please see the application guidelines posted on the relevant graduate school’s website (ref. P.9-16).

(For details of the AAO: http://www.kyoto-u.ac.jp/ja/international/students1/ku-aao.html)

Entrance examinations for the graduate school consist of the subjects of specialized fields, a foreign language, and an oral examination. Most graduate schools accept students enrolling in April but some graduate schools accept students both in April and October. Inquiries, please contact the relevant administration offices (ref. P.27-28).
Application Guidelines for Entrance Examinations (Graduate Schools)

Application Guidelines are mainly posted on each Graduate School’s website. The below tables indicate the available months of application guidelines for graduate schools. If two or more months are listed together, it indicates the schedules for the summer session exam and winter session exam, respectively. For information on English-Taught Degree Programs, please refer to pages 11–16.

Schedule of the new academic year is subject to change. Please visit the relevant graduate school’s website listed below for the latest information. Should you have any questions, please contact the relevant administration office (ref. P.27-28).

Applicants who have graduated or expect to graduate from non-Japanese universities may apply to study at KyotoU graduate schools as regular or research students. The application process for each graduate school differs, and may or may not include a preliminary AAO review (the "AAO process"). For further information, please refer to the following link:

*1 Application guidelines scheduled to be released in May are for the summer session exam of selected divisions. Application guidelines scheduled to be released in October are for the winter session exams of all divisions.

*2 Schedules vary for different programs. Applicants are advised to contact the relevant administration office.

*3 Application guidelines are the same for both April and October enrollments.

*4 Only available on the website (web application).

*5 If there is a winter session exam in addition to the summer session exam, application guidelines for the Department of Advanced Mathematical Sciences (AMS) will be released in October, and application guidelines for other departments will be released in November.

*6 April Enrollment: Only for the department of Communications and Computer Engineering

October Enrollment: Only for the department of Systems Science and the department of Communications and Computer Engineering

# English-Taught Degree Programs

Kyoto University offers a range of programs for international students that are taught and assessed entirely in English. Admission and support services are also provided in English, making the university’s world-class facilities and teaching available to students with no Japanese language ability. For details of a specific program, please visit the relevant program website.

Applicants who have graduated or expect to graduate from non-Japanese universities may apply to study at Kyoto University as regular or research students. The application process for each graduate school differs, and may or may not include a preliminary AAO review (the AAO process). For further information, please refer to the following link:

- "Admissions guide for graduates of overseas universities"
  https://u.kyoto-u.jp/graduate-admissions-for-overseas-graduates

Applicants are advised to check the website or to contact the administration office for more information.
** Applicants are selected by means of a comprehensive evaluation of application documents.
01 International Graduate Programme for East Asia Sustainable Economic Development Studies

Enrollment: October
Student Intake: Master: 14, Doctor: 8 (including 2 Japanese students respectively)
Degree: Master’s Degree, Doctoral Degree
Website: http://www.econ.kyoto-u.ac.jp/kueac/

Programme Description:
There are a number of challenges that East Asia must address if it is to maintain its economic role as one of the leaders of the world. These include challenges relating to environmental stability, food and energy supplies, uneven development between agricultural and industrial sectors, widening income disparities and aging populations, and accountability of government and business sectors.

This programme is designed to provide international students with both advanced academic knowledge and practical skills. Our academic year begins in October. Students are from a variety of countries including China, South Korea, Indonesia, Thailand, Malaysia, Philippines, Viet Nam, Uzbekistan, France, Germany, Italy, Turkey, Egypt, UK, Belgium, Spain, USA, Mexico and Japan. The programme is offered in English, and Japanese language skills are not required at the time of admission. The Master’s programme offers both basic and advanced courses through which students can enjoy a comprehensive curriculum.

The Doctoral programme offers Overseas Field Research and International Graduate Student Workshop subjects through which students further develop a deep understanding of the current issues in East Asia.

In addition to classes designed specifically for this programme, students will participate in selected courses at the Graduate School of Economics as well as other graduate schools. Students will develop academic knowledge and practical skills in international setting.

We offer many opportunities to conduct field research at diverse sites such as large manufacturing plants and small factories, cutting-edge businesses and rural farming communities throughout East Asia so that students can develop a multidisciplinary and critical sense of reality. These are all needed to contribute to sustainable development in East Asia as academic researchers, government officials, or social entrepreneurs.

02 Undergraduate International Course Program of Civil Engineering

Enrollment: April
Student Intake: 30
Degree: Bachelor’s Degree
Website: https://www.s-ge.i.kyoto-u.ac.jp/mt/en
E-mail: icp_ug@i.kyoto-u.ac.jp

Course Description:
This four-year international course in English leads to a Bachelor of Engineering degree from the Undergraduate School of Global Engineering. The course aims to cultivate human resources capable of designing and managing civil infrastructures while considering global environmental issues around urban and regional areas, particularly in Asia and African countries.

In the first and second years, students are required to take lectures in fundamental mathematics, physics and liberal arts. Scientific English and basic Japanese lectures are also available. From the second year, specialized civil engineering lectures are given, including those on environmental engineering and earth resources, and energy science. For the first three years, all lectures are given at Yoshida Campus. In the fourth (final) year, students with sufficient credits may join a research group and relocate to Katsura or Uji Campus. Each student will undertake research for their bachelor thesis at their designated laboratory. The thesis is presented and examined in February of the final year, in order to graduate in March. Related courses: master’s courses in the Management of Civil Infrastructure, and Urban and Regional Development in addition to a doctoral course in Human Security Engineering.

03 International Course in Management of Civil Infrastructure in the Department of Civil and Earth Resources Engineering

Enrollment: April
Student Intake: 12 (combined capacity with the International Course in Urban and Regional Development in the Department of Urban Management)
Degree: Master’s Degree
Website: http://www.ce.i.kyoto-u.ac.jp/mci/en/
E-mail: icp_master@i.kyoto-u.ac.jp

Course Description:
This is a two-year program leading to a Master of Engineering degree. This course aims to cultivate human resources capable of managing civil infrastructures and addressing environmental issues. Several issues are in focus, such as: achieving a stable supply of natural resources and harmonize human activities with the global environment; the development of fundamental key technologies that support public infrastructure and energy development; the creation and development of new versatile technologies and design methods concerning the construction, improvement, operation, and maintenance of public infrastructure and disaster mitigation measures, as well as technologies related to the exploration, development, and utilization of the natural environment, natural resources and energy. Such issues are approached by the framework of applied mechanics and computational mechanics with the integration of theoretical and experimental works.
04 International Course in Urban and Regional Development in the Department of Urban Management

Enrollment: April
Student Intake: 12 (combined capacity with the International Course in Management of Civil Infrastructure in the Department of Civil and Earth Resources Engineering)
Degree: Master’s Degree
Website: http://www.umd.kyoto-u.ac.jp/urd/en/
E-mail: icp_master@t.kyoto-u.ac.jp

Course Description:
This is a two-year program leading to a Master of Engineering degree. The department aims to make advances in social analysis technology utilizing urban engineering, traffic engineering, and environmental system engineering to analyze human activities in cities. Research is conducted in urban planning and traffic planning to realize safe and sustainable urban systems. Advances in urban infrastructure relating to building foundations and rivers are examined. The department is working to establish methodologies and engineering techniques for the comprehensive management of urban systems, incorporating assessments of the sustainability of cities based on cutting-edge research and an interdisciplinary perspective that embraces the social sciences and humanities. Advanced information communication technology is integrated with social infrastructure technology in order to realize sustainable, safe, and internationally competitive urban systems that can ensure a high quality of life. Lectures and seminar-based subjects are designed for students to independently plan, implement, summarize and present research results from project surveys and company seminars.

05 Integrated Engineering Course, Human Security Engineering Field

05 Integrated Engineering Course, Human Security Engineering Field

Enrollment: April/October
Student Intake: Master: 20, Doctor: 20
Degree: Master’s and Doctoral Degree
Website: http://hse.gcoe.kyoto-u.ac.jp/
E-mail: contact@hse.gcoe.kyoto-u.ac.jp

Course Description:
This is a master and doctoral program with a solid interdisciplinary education in the core fields and the four related fields: urban governance, urban infrastructure management, health risk management, and disaster risk management. Studies on these related topics will foster researchers and engineers who have the ability to integrate and apply their knowledge toward ensuring urban human security, while contributing to advances. We aim to instill the following qualities in our academics: creativity (to go beyond the boundaries of the existing specialized fields); internationality (the ability to present and debate research in English, perform education and research activities overseas, and build an international human network); and independence (the ability to plan research, lead education and research, secure research funds, and solve problems in the field). The availability of core content in English and overseas internships for training in the field help students achieve these program objectives. Students who proceed to the Integrated Course in Human Security Engineering must complete the completion requirements of that course, rather than those of the department in which they are enrolled. Upon completion of the course, they will be certified as a graduate of the Human Security Engineering Education Program and receive a program certificate in addition to their degree certificate.

06 Special Course in Agricultural Sciences — For the Global Future of Life, Food and the Environment

Enrollment: April/October
Student Intake: Master: 5, Doctor: 5
Degree: Master’s Degree, Doctoral Degree
Website: http://www.kais.kyoto-u.ac.jp/english/global30/
E-mail: agrig30@adm.kais.kyoto-u.ac.jp

Course Description:
This course aims to develop the next generation of human resources with advanced research abilities, profound knowledge and an international perspective in the fields of life, food and the environment. Master’s and doctoral students in this course can study a diverse range of agricultural, life and environmental sciences: Agronomy and Horticultural Science, Forest and Biomaterials Science, Applied Life Sciences, Applied Biosciences, Environmental Science and Technology, Natural Resource Economics, and Food Science and Biotechnology. We will examine the social effects of agriculture, such as the results of adopting various farming approaches. Each student will benefit by having several supervisors for their research guidance. The curriculum offers courses in the fields of natural and environmental sciences, geography, economics and information systems. Lectures are given by international teaching staff. Seminars and experimental courses are given by the course supervisors.
### International Energy Science Course

**Enrollment:** Master’s-October, Doctoral-October/April  
**Student Intake:** Master: 10, Doctor: 10  
**Degree:** Master’s Degree, Doctoral Degree  
**Website:** [http://www.energy.kyoto-u.ac.jp/en/](http://www.energy.kyoto-u.ac.jp/en/)  
**E-mail:** intl@energy.kyoto-u.ac.jp

**Course Description:**

The International Energy Science Course (IESC) Master’s Program teaches students about energy systems from a broad, crossdisciplinary perspective, along with in-depth understanding of their own major. Teaching in each major takes place within the three departments of the Graduate School of Energy Science. All students must complete course work and research totaling to 30 credits, and successfully defend their Master’s thesis (15 thesis credits). The IESC doctoral program provides the international students and researchers who have a Master’s degree (or equivalent) an opportunity to further their studies toward a doctoral degree at Kyoto University.

Major available within the course will fall broadly within one of four departments: Socio-Environmental Energy Science (SES), Fundamental Energy Science (FES), Energy Conversion Science (ECS), and Department of Energy Science and Technology (EST) *1. SES leads the research on the effective use of energy and resources and analysis of energy systems in order to build a sustainable social system within the global environment, while FES offers graduate students fundamental energy science education and conduct research to contribute to cleaner energy solutions. ECS conducts research and education in generation, conversion, control and utilization of various kinds of energy in focus on efficient and clean energy. EST conducts education and research on the development of more efficient utilization of direct and indirect energy supplies based on disciplines such as resources, metallurgical, mechanical and electrical engineering.

*1 IESC of EST is available only for DOCTORAL programs.

### International Course in Intelligence Science and Technology

**Enrollment:** April/October  
**Student Intake:** a small number of students  
**Degree:** Master’s Degree, Doctoral Degree  
**Website:** [http://www.i.kyoto-u.ac.jp/en/introduction/g30.html](http://www.i.kyoto-u.ac.jp/en/introduction/g30.html)  
**E-mail:** jyocho-kyoumu@mail2.adm.kyoto-u.ac.jp

**Course Description:**

This course focuses on clarifying the mechanisms of information processing and applying that expertise to the development of versatile high-level applications. We study not only how computer systems achieve and transcend human cognitive ability in vision, auditory, language understanding, but also the psychology, brain science, and biological information. The curriculum offers a wide range of topics covering mathematics and information science, including discrete algorithm, intelligent algorithm, statistics, machine learning, pattern recognition, cognitive science, biological information, etc. These theories are explored as students investigate how technologies are applied to an application-oriented research project. In our department, we work with algorithmic principles; make use of state-of-the-art technologies; and inspire students to take their knowledge and imagination into new studies.

### International Course in Social Information

**Enrollment:** April/October  
**Student Intake:** a small number of students  
**Degree:** Master’s Degree, Doctoral Degree  
**Website:** [http://www.i.kyoto-u.ac.jp/en/introduction/g30.html](http://www.i.kyoto-u.ac.jp/en/introduction/g30.html)  
**E-mail:** jyocho-kyoumu@mail2.adm.kyoto-u.ac.jp

**Course Description:**

This course assumes that the information is the most important concept in society and that its proper management helps to answer societal needs and problems, which, nowadays, are subject to rapid changes as technological advances are made. Our department provides opportunities to study ICT technologies and social information systems in the areas of information management, multi-agent systems and system dynamics. In the area of information management the following content will be explored: databases, information retrieval, web information management, distributed information systems, information organization and retrieval, information systems design for object-oriented design/analysis and programming, database design, user interface design, web information systems design, and information systems analysis including data mining. In the area of multi-agent systems, students delve into business processes and services computing. In the area of content, students learn system dynamics, environmental issues, GIS, field research and statistics. Biosphere informatics and information system analysis will be also taught. In the area of social informatics, topics will include information security, information economy, digital rights, digital ethics and IT policy and agenda.
10 International Course in Communications and Computer Engineering

Enrollment: April/October
Student Intake: a small number of students
Degree: Master's Degree, Doctoral Degree
Website: http://www.i.kyoto-u.ac.jp/en/introduction/g30.html
E-mail: jyoho-kyomu@mail2.adm.kyoto-u.ac.jp

Course Description:
The focus of this course lies in the theoretical aspects of modern information technologies, principally, the design and analysis of algorithms, computational complexity, and discrete mathematics related to computer science. Two introductory graduate classes are provided, neither of which is designed solely for international students. Introduction to Algorithms and Informatics is an introductory class for non-specialists. Lectures cover various aspects of modern computer science, particularly the fundamentals of algorithm design and analysis, data structures, and important concepts such as linear programming, randomization, heuristics and approximation. Theory of Computational Complexity is an introduction to the field of computational complexity, which aims at classifying computational problems according to their difficulty by investigating the amount of resources needed to solve them. The class covers both the foundations of computational complexity and more advanced topics such as hardness of approximation and communication complexity. For both classes no specific technical background is required. Other classes given in English are Parallel and Distributed Systems, System-Level Design Methodology for SoCs, and Atmospheric Measurement Techniques. Students can also take the general Perspectives in Informatics seminars, as well as classes in the other two international courses offered by the School of Informatics.

11 Global Frontier in Life Science

Enrollment: Graduate School of Biostudies: Master's - April/October, Doctor - April/October
Graduate School of Medicine: Master's - April, Doctor - April
Student Intake: Graduate School of Biostudies: Master's - 10, Doctor - 10
Graduate School of Medicine: Master's - Small Number, Doctor - Small Number
Degree: Master's Degree, Doctoral Degree
Website: Graduate School of Biostudies: http://www.lif.kyoto-u.ac.jp/en/
Graduate School of Medicine: http://www.med.kyoto-u.ac.jp/en/
E-mail: Graduate School of Biostudies: 150kyomu@adm.lif.kyoto-u.ac.jp
Graduate School of Medicine: kyoumu-in@mail2.adm.kyoto-u.ac.jp

Course Description:
The Graduate Schools of Biostudies and Medicine offer a joint three-year Doctoral Program. This program aims to educate world-class scientists in the fields of life and medical sciences to contribute to the advancement of basic science and human welfare. The Graduate School of Medicine also offers a four-year Doctoral Degree of Medical Science. These two graduate schools hold independent entrance examinations (to be announced on the respective websites above), and accept up to ten applicants. Related joint Master’s programs are offered by the Graduate School of Medicine and by the Graduate School of Biostudies. These programs are open to both international and domestic students, and are held entirely in English, including the entrance examinations, lectures, experiments and discussions.

12 International Environmental Management Program

Enrollment: April/October
Student Intake: Master: Small Number, Doctor: Small Number
Degree: Master's Degree, Doctoral Degree
Website: http://www2.ges.kyoto-u.ac.jp/en/
E-mail: 1601kikyukankyoumu@mail2.adm.kyoto-u.ac.jp

Program Description:
The Graduate School of Global Environmental Studies (GSGES) has established the International Environmental Management Program to strengthen educational and research opportunities for international students. GSGES offers a Doctoral Program in Global Environmental Studies for students interested in pursuing environmental research and academic study, and Master’s and Doctoral Programs in Environmental Management for students interested in applied environmental management from the local to global levels. Students who join in the International Program will be enrolled in one of these three degree programs. GSGES features a multidisciplinary program, with faculty drawn from a variety of disciplines, including engineering, agriculture, economics, law and social sciences. It provides practical education on environmental issues through long-term internships, fieldwork and lecture- and discussion-based courses for thesis preparation.
13 International Course for Primatology and Wildlife Research

**Enrollment:** April/October  
**Student Intake:** Master: 5, Doctor: 5  
**Degree:** Master's Degree, Doctoral Degree  
**Website:** [http://www.cicasp.pli.kyoto-u.ac.jp/](http://www.cicasp.pli.kyoto-u.ac.jp/)  
**E-mail:** cicasp@ml.pli.kyoto-u.ac.jp

**Course Description:**
The Primate Research Institute (PRI) in Inuyama and the Wildlife Research Center (WRC) in Kyoto promote basic and applied research by synthesizing various approaches to enhance our understanding of all primates and other wildlife. A new international course for graduate students focusing on the study of non-human primates and other animals, with the aim of promoting their conservation, health and welfare, as well as advancing our understanding of human nature, started in April 2011. Students in this course will join either the PRI or WRC and receive courses conducted in English. The course will be managed by the Center for International Collaboration and Advanced Studies in Primatology (CICASP), which was founded in April 2009. The PRI presently has ca.40 faculty members, 50 graduate students and 20 international scholars, with international students now comprising over ca.30% of the student body. The institute is also home to ca.1200 non-human primates of 13 species. CICASP is staffed by international and Japanese faculty members and administrators who are fluent in English to facilitate student integration. In 2014, CICASP partnered with the newly created Leading Graduate Program in Primatology and Wildlife Science (PWS) of Kyoto University. Students who enroll in CICASP and Kyoto University can apply to PWS and if successful receive additional training in the area of conservation science, public outreach and curation (e.g. all zoos, aquariums and museums), as well as financial support to conduct their research. Please contact us at the email address above for assistance in finding a suitable supervisor for the graduate course.

14 International Project Management Program (i-PM)

**Enrollment:** April  
**Student Intake:** 10  
**Degree:** Professional Master's (MBA)  
**Website:** [http://www.gsm.kyoto-u.ac.jp/en/](http://www.gsm.kyoto-u.ac.jp/en/)  
**E-mail:** kei.ikyomu@mail2.adm.kyoto-u.ac.jp

**Course Description:**
The International Project Management Program (i-PM) offers a comprehensive and thorough program that focuses on the projects of temporal cooperation between organizations (business teams) established in order to achieve a certain goal in projects. This program is to nurture international project management professionals who can combine the latest research in management and specialized business practices and who are ready to meet challenges and contribute to the diverse and harmonious development of society. Students in the program shall obtain basic core competencies in economics, management and accounting and then, those will be combined with specialized and practical subjects such as policy evaluation, contract management, development management, project finance, risk management, disaster management, international mega project management, etc. as well as business writing and negotiation. Internship placements and workshops are available. Students of all nationalities are welcome. In the class taught in English, it is possible to stimulate each other by working together. This program will become a stronghold for internationalization in higher education and will help create leaders of the next generation in the world.

15 International Business Administration Program (i-BA)

**Enrollment:** April  
**Student Intake:** 10  
**Degree:** Professional Master's (MBA)  
**Website:** [http://www.gsm.kyoto-u.ac.jp/en/](http://www.gsm.kyoto-u.ac.jp/en/)  
**E-mail:** kei.ikyomu@mail2.adm.kyoto-u.ac.jp

**Course Description:**
The International Business Administration Program (i-BA) is a program of study that leads to a general management degree while helping you develop your vision and the skills to achieve it. Students get the business knowledge and specialized skills to expand career choices. This program provides wide area of expertise such as business leadership, service & hospitality management, finance and accounting.

16 Kyoto-Cornell International Collaborative Degree Opportunity (KC-CDO)

**Enrollment:** April  
**Student Intake:** 20  
**Degree:** Professional Master's Degree (MBA) (Kyoto), Master's Degree (MMH) (Cornell)  
**Website:** [http://www.gsm.kyoto-u.ac.jp/en/](http://www.gsm.kyoto-u.ac.jp/en/)  
**E-mail:** kc-cdo@mail2.adm.kyoto-u.ac.jp

**Course Description:**
The program offers a unique curriculum which is a combination of advanced management fundamentals and the core of service and hospitality specialized principle to nurture global professionals. Students will be awarded two Master's degrees in two years (Master of Business Administration and Master of Management in Hospitality) by attending the Kyoto University Graduate School of Management for two semesters and the Cornell SC Johnson College of Business, School of Hotel Administration for the other two semesters. This program endeavors the premier educational system that draws upon the state-of-the-art research in management and business practices to propel the students not only as a future leader in the hospitality industry but a specialist in the service sector of any organizations.
Research Students [Non-Regular Students]

Those wishing to pursue graduate studies or conduct research at Kyoto University may do so as non-degree-seeking Research Students (Kenkyusei). To qualify for this status, applicants must obtain approval from a prospective advisor, then submit an admission form and other required documents to the University. How to obtain the approval ① Select a prospective advisor and check out the application procedures by searching on websites, and then follow the procedures. ② Proceed the AAO process if it’s required (it’s required in many cases), then follow instructions given by the AAO.

For more details or having inquiries, please contact relevant administrative offices (ref.P.27-28).

Exchange Students [Non-Regular Students]

Kyoto University offers two incoming exchange programs — both accepting students from institutions with a university-level exchange agreement — for one semester (6 months) or two (12 months) in Kyoto. Applications should be submitted to Kyoto University through the home institution’s international office; direct applications from students will not be accepted. The application deadline is February for October enrollment, and September for enrollment in April of the following year.

① Kyoto University International Education Program (KUINEP)

This program enables undergraduates from partner universities to study in English. Beginning with spring 2020 enrollment, participants are required to register for at least seven courses per semester, mostly from the Liberal Arts and Sciences. This may include up to two Japanese language classes (credited). They can also take courses offered by undergraduate faculties, including those taught in Japanese, subject to approval from the lecturers in charge.

Each course usually comprises two hours of lecture time per week, and carries two credits.

② Kyoto University General Exchange (GE) Program (GEA ・ GESR)

In this program, students either take courses, mostly from the Kyoto University Faculties or Graduate Schools to which they are affiliated (as “General Exchange Special Auditors”, or GEAs), or conduct research under academic supervisors without attending classroom lectures (as “General Exchange Special Research Students”, or GESRs).

Beginning with spring 2020 enrollment, undergraduate GEAs must take at least seven courses per semester. This may include up to two Japanese language classes. The requirement for postgraduate GEAs is four courses, not including Japanese language classes, as in previous semesters.

In the case of GESRs — an enrollment status available only to graduate students — language requirements depend entirely on their supervisors.

Japanese Language Study

Both KUINEP and General Exchange Program students are eligible to take Japanese-language courses from ILAS’ Education Center for Japanese Language and Culture. Some are included in the regular curriculum and credited, while others are not.

GESRs may take non-credited courses only, while KUINEP and GEAs may take both credited and non-credited ones. Grades for the credited Japanese-language courses taken will be included in the official transcript, with two official credits awarded for each (ref. P.23 “Studying Japanese”).

Undergraduate Summer Research Program in Science and Biotechnology
【Non-Regular Students】

Kyoto University Amgen Scholars Program

The Kyoto University Amgen Scholars Program is a short summer scholarship program launched in 2015. The program enables students from around the world to gain research experience under the supervision of leading scientists. Please visit the websites listed below for the latest information (program information is updated annually).

Program Outline

- Research activities in assigned laboratory
- Poster session in which students share their summer research projects with a larger audience
- Exchange activities with other participants (seminars and extracurricular activities to experience Japanese culture)
- Participation in the Amgen Scholars Asia Symposium

Financial Support

Travel costs, a scholarship of 180,000 JPY, accommodation, etc.

Number of Participants

15 students

Program Dates

8 weeks (June 9 to August 8 for the year 2020)

Application Period

Online applications open in November every year (subject to change)

Eligibility Requirements (Applicants must meet all of the following criteria)

- Applicants must be undergraduate students who:
  - Are enrolled in colleges or universities worldwide that award a bachelor's degree (or equivalent)
  - At the minimum, have completed their first year of undergraduate study at the time the summer program begins
  - Are not graduating before the Amgen Scholars Program begins and will resume undergraduate studies for at least one semester or one quarter after the program ends

- Applicants must also have:
  - A strong record of academic performance
  - A good functional knowledge of English. Students whose first language is not English must have one of the following: a minimum TOEFL (iBT) score of 72, IELTS overall band score of 5.5, Cambridge English FCE, TOEIC score of 1095, TOEIC L&R score of 785, or TOEIC S&W score of 310
  - An interest in pursuing a Ph.D.

Program Information and Applications

Kyoto University "Amgen Scholars Program"

What is the Amgen Scholars Program?

Made possible through grant funding from the Amgen Foundation, the Amgen Scholars Program allows undergraduates from around the world to engage in cutting-edge research at world-class institutions.

Amgen Scholars
http://www.amgenscholars.com/

Short-Term International Students 【Non-Regular Students】

In addition to Amgen Scholars Program, some of the faculties and graduate schools offer short-term special courses such as short summer programs and internships, and accept “Short-Term International Students” although most of them are designed for students whose institutions have a university-level student exchange agreement with Kyoto University. Please contact the relevant faculty for details.

Admissions for Japanese Government Scholarship (Monbukagakusho [MEXT*] Scholarship)

As of May 1st, 2019, 579 of Kyoto University’s 2,617 international students have been awarded the Japanese Government (Monbukagakusho: MEXT) Scholarship. This section provides general information on the MEXT Scholarship. For further details, please refer to the Japan Student Services Organization (JASSO) website and the “Study in Japan Comprehensive Guide” website of the Ministry of Foreign Affairs of Japan mentioned below.

1) University Recommendation

In case of university recommendations, Kyoto University screens the applications of research students, and selects candidates to recommend to the Ministry of Education, Culture, Sports, Science and Technology (MEXT) as research students, master’s degree students, professional degree students, or doctoral degree students. To apply through a university recommendation, please contact a Kyoto University faculty member whom you would like to have as an academic advisor, and consult him/her to apply.

Scholarship Benefits (As of April, 2020)

- Fees of Entrance examination, Admission and tuition are exempted.
- One round-trip ticket is provided.
- Amount of scholarships vary by the student status.

*1 Students who study in certain designated areas will be provided an additional monthly stipend of 2,000 JPY or 3,000 JPY. The amount is subject to change depending on the annual budget.

*2 Undergraduate MEXT scholarship students are not admitted by the Faculty of Pharmaceutical Sciences (6-year program) or the Faculty of Medicine.

*3 Undergraduate International Course Program of Civil Engineering offered by the Undergraduate School of Global Engineering, the Faculty of Engineering is the only undergraduate program that accepts applications for University Recommendation. Students who apply through this program arrive in April.

*4 Graduate students who apply through Japanese universities arrive in October; embassy recommended students have the choice of arriving in either April or October.

Application

Pre-arrival applications should be made through a Japanese embassy or consulate (embassy recommendations) or through a university in Japan (university recommendations). Most MEXT Scholarship students at Kyoto University are awarded the scholarship through Embassy Recommendations.

* Students must pass the entrance exams prior to enrollment.
2) Embassy Recommendation

Applications received through the Japanese embassy (or consulate) in the applicants’ home countries are termed “embassy recommendations.” Once such an application has been accepted, the first screening is conducted by the Japanese embassy or consulate. To apply through an embassy recommendation, please contact the appropriate Japanese diplomatic mission in your country. For applicants from China, the Ministry of Education of the People’s Republic of China accepts applications and conducts the first screening. The admission requirements, schedule and process differ from embassy recommendations. Successful Chinese Ministry recommended applicants generally come to Japan in October. For details, please contact your home university or China Scholarship Council (CSC) in China.

*1 Those who passed the preliminary screening by the Japanese embassy/consulate in your country and require an acceptance letter from a member of our academic staff, please select a prospective advisor by searching our official websites, then contact to the relevant administrative office which the prospective advisor belongs (You should give the name of prospective advisor and “Certification of Preliminary Selection” issued by the relevant Japanese diplomatic mission (PDF) when you make the contact). To follow the instruction which given by the administrative office. (ref. P.27-28 for contact information)

Following documents must be submitted for receiving an acceptance letter (non-returnable):
- Certification of preliminary selection issued by the relevant Japanese diplomatic mission (Original)
- An official Letter of Acceptance (in the prescribed form)
- Copies of the documents you have submitted to the Japanese diplomatic mission in your country
- Any additional documents required by the prospective advisor or administration

*2 Dates in parenthesis are for graduate students and research students coming to Japan in late September.

\(^1\) In certain circumstances, the fee may be reduced to 10,000 JPY for applicants who are screened based on submitted materials etc. with no written examination. For specific details, please check the guidelines for admission of the graduate school you wish to enter.

\(^2\) Should tuition fees be revised during a student’s period of enrollment, the new amount will become effective from that point on.

Payment Schedule

- Examination Fee: To be paid at the time of application for admission.
- Admission Fee: To be paid when completing entrance formalities.
- Tuition: To be paid in two installments in May and in November.

Tuition Exemption

Regular (degree-seeking) undergraduate and regular graduate students with excellent academic records who experience financial difficulty may be eligible for a full or half tuition exemption. Application information is put on the bulletin boards of the Student Affairs Division and faculty/graduate school offices, and on the Kyoto University website. Students who wish to apply for the tuition exemption are advised to pay close attention to the notice. Since the number of students who receive the tuition exemption is limited, the selection process is very competitive. Please ensure that you have sufficient financial resources before coming to Kyoto University.

Scholarships

In addition to Japanese Government (Monbukagakusho: MEXT) Scholarship, the following scholarships are also available for those wishing to study at Kyoto University. It should be noted, however, the selection processes are very competitive, and in most cases applications are only accepted after entrance to the university. It is generally necessary, therefore, to have sufficient financial resources prior to entering Kyoto University. For more information on scholarships, please visit the Japan Student Services Organization (JASSO) website (http://www.jasso.go.jp/en/index.html), and click “Study in Japan” → “cholarships for Study in Japan”.

Foreign Government Scholarship

Foreign government scholarships are a further scholarship option. For further information on application periods and benefits, please contact the appropriate agency in your country.

Monbukagakusho Honors Scholarship for Privately Financed International Students

Privately financed international students studying at a university in Japan are eligible to apply for an Honors Scholarship offered by Japan Student Services Organization (JASSO). As of April 2018, undergraduate student awardees and graduate student awardees receive 48,000 JPY per month. Applications are generally accepted following admission to the university.

Student Exchange Support Program (Scholarship for Short-Term Study in Japan)

International students who are hosted by a Japanese university under a student exchange agreement between the host university and their home university are eligible to apply for the Scholarship for Short-Term Study in Japan, provided by the Japan Student Services Organization (JASSO). The scholarship provides a monthly stipend of 80,000 JPY during the student’s period of stay in Japan. Applications for the scholarship should be made to Kyoto University through the student’s home institution. The application should be made together with the application for the exchange program. Direct applications from students to either Kyoto University or JASSO will not be accepted.

Scholarships from Private Foundations

The application process for scholarships from private foundations varies. Some can be made directly by the individual students, and some must be made through the applicant’s university. Every year, Kyoto University selects and recommends international scholarship candidates to approximately 60 private institutions based on an intra-university selection process. Each organization commonly offers a scholarship of between 30,000 JPY and 180,000 JPY per month to one or two students. Applications are generally accepted following admission to the university. (A few scholarships accept pre-enrollment applications from prospective students who have already passed the entrance examination and are intending to enter the university.) Currently enrolled students who wish to apply for such scholarships are advised to regularly check the bulletin boards etc. of their faculty or graduate school for announcements. Please note that many of these scholarships require applicants to have a certain level of Japanese language ability. Please refer to the scholarship information on page 25-26, each foundation’s website and JASSO website (http://www.jasso.go.jp/en/index.html).
Living Expenses

Although the cost of living varies depending on factors such as housing expenditure and food budget, the average living expenses for international students in the Kyoto and Osaka area are 81,000 JPY per month (excluding academic fees), according to the "Student Guide to Japan 2018-2019," published by the Japan Student Services Organization (JASSO).

- Japan Student Services Organization (JASSO)

Housing

Kyoto University has five International Houses, which provide accommodations for international students and researchers. However, the number of rooms and tenancy period of the Houses are limited. International students can also apply for accommodation in Kyoto University’s Student Dormitories (open to domestic and international students) and public housing. Many international students choose to live in private housing, such as private apartments.

Kyoto University International Houses

As of April 2020, there are seven accommodation facilities for international students and researchers, located at Shugakuin, Yoshida, Uji, Ohbaku, Misasagi, Hyakumanben and Okazaki. The move-in periods for the Houses are April and October. International students who will be enrolled at Kyoto University within less than a year of their arrival in Japan are eligible to apply. The tenancy period is from one month (minimum) to one year (maximum), and the period may not be extended.

To apply, please contact your host professor or your faculty/graduate school office in advance.

- Rates
  Rents vary according to location and room type. For details, please visit the website below.
  (Example for Ohbaku International House)
  The charges of water, bedding and internet access are included.
  - Single room: Rent 12,400 JPY per month
  - Married couple’s room: Rent 19,800 JPY per month
  - Family room: Rent 24,900 JPY per month

- Kyoto University International Houses
  https://kuiso.oc.kyoto-u.ac.jp/housing/kuih/en

Apartments

To find an apartment, international students are advised to go to the Kyoto University CO-OP or real estate agencies after their arrival in Japan. Some real estate agencies accept search and application for apartment from overseas.

- Rates
  Rents vary according to factors such as location, room size, and facilities. The following is a typical example for ordinary apartments in Kyoto. In general, rooms are not furnished.
  - Single room with shared kitchen and toilet: 25,000 JPY -30,000 JPY per month
  - Single room with private kitchen, toilet and bath: From 45,000 JPY and up per month

  In addition to rent, it is customary in Japan to pay other fees such as a key money, a deposit and an introduction fee. This can amount to an up-front payment of several months’ rent when signing a lease. You will also need a suitable person to act as your guarantor.

**Supports**

**Studying Japanese**
A certain level of Japanese language ability is needed for the international students to have smooth communication in daily life in Japan. The Education Center for Japanese Language and Culture of the Institute for Liberal Arts and Sciences (ILAS) of Kyoto University offers the following types of classes: Japanese language classes in the Liberal Arts and Sciences curriculum (hereinafter referred to as [1]), and Japanese language support classes not included in the regular curriculum (referred to as [2]). Eligible students to take [1] are: degree-seeking international students, Japanese Government (Monbukagakusho [MEXT]) Scholarship Students, exchange students except General Exchange Special Research Students (GESRs), research students who are permitted to attend Japanese classes of [1] by their academic advisor and Kyoto iUP Students.

[2] that all international students and researchers at Kyoto University can take covers the levels from introductory to advanced course including Business Japanese Course.

Japanese language classes take place from April to August in the spring semester and from October to February in the autumn semester. Class registration opens twice a year in March and September. In order to take Japanese language classes, go through the required registration procedure on the website below. The class syllabi are also available on the same website.

- **Japanese Language Classes** by Kyoto University Institute for Liberal Arts and Sciences
  [http://www.z.k.kyoto-u.ac.jp/introduction/education-center-for-japanese/japanese-language-classes/?locale=en](http://www.z.k.kyoto-u.ac.jp/introduction/education-center-for-japanese/japanese-language-classes/?locale=en)

Please note that there is no specialized faculty or program for students who want to learn only Japanese language at Kyoto University like an international student special course. In addition, the university does not offer summer intensive courses of Japanese language either.

Family members of international students are not eligible to take the classes offered by the Education Center for Japanese Language and Culture of the Institute for Liberal Arts and Sciences.

- **Off-Campus Japanese Learning**
- **Kyoto City International Foundation**: [http://www.kcif.or.jp/en](http://www.kcif.or.jp/en)
- **Kyoto Prefectural International Center**: [http://www.kpic.or.jp/english/](http://www.kpic.or.jp/english/)

**International Student Tutor System**
In general, the tutor system for international students is designed to assist regular (degree-seeking) students and some non-regular (non-degree seeking) students, based on a recommendation from their supervisors. Tutors are generally graduate students selected from the graduate school to which the international student belongs. For details, please enquire at the relevant administration office after enrollment.

**On-Campus Advising Services for International Students**
There are several advisory services for international students currently attending Kyoto University. The services are confidential and free of charge.

At Student Lounge ‘KI-ZU-NA’ or International Student Advising Room in the Education Promotion and Student Support Department Bldg. (Former Main Bldg. of the Petrochemistry Course), students can seek counseling on their problems and worries they cannot handle by themselves such as various matters about their life in Japan, interpersonal issues, or procedures to receive scholarships.

Those fluent in Japanese may also seek advice at the university’s General Student Support Center Counseling Office.

**Kyoto University Student Lounge ‘KI-ZU-NA’**
Student Lounge ‘KI-ZU-NA’, meaning ‘bonds’ in Japanese, opened in the spring of 2002 as a place for students to create bonds of friendship across borders. ‘KI-ZU-NA’ now welcomes all members of the community – including staff, faculty, and researchers, as well as students – to spend time together and join or organize cross-cultural activities.

The facility features a Reading Room, stocked with language learning materials, and a Salon, available for studying, language exchange, and other activities.

‘KI-ZU-NA’ hosts its own event every month, offering opportunities for participants to experience Japanese culture and get to know their counterparts from other countries.

- **Kyoto University Student Lounge ‘KI-ZU-NA’**
Visa · Obligations · Other Information

Visa

**Temporary Visitor’s Visa for Entrance Exams**
In order for international applicants to enter Japan and sit the Kyoto University entrance examinations, they must obtain a Temporary Visitor’s Visa (Tankitaizai) through the Japanese diplomatic mission in their country. Temporary visitors are not allowed to engage in any paid activities.

Changes in status of residence from “Short-Term Stay” to another type of status of residence after entry to Japan are not usually approved without a special reason. In this case, a certificate of eligibility and a brief letter explaining the situation are required.

**Student Visas**

- **Those who are relocating from overseas**
  Successful candidates must obtain a Student Visa (Ryugaku) through the Japanese Diplomatic Mission in their country by presenting a certificate or notification of acceptance from Kyoto University, a valid passport and other relevant documents. In order to receive a visa, you may need to submit evidence that you have sufficient funds to support yourself during your stay in Japan.

  Upon request by the relevant faculty/graduate school office, the Kyoto University International Service Office will apply for Certificates of Eligibility for international students and their family members, provided the students have already passed the entrance examination and are intending to enroll at the university. For details, please inquire at the relevant administration office. Note that recipients of Japanese Government (MEXT) scholarship do not need to apply for the Certificate of Eligibility.

- **Kyoto University International Service Office** [https://kuiso.oc.kyoto-u.ac.jp/visa/about/en](https://kuiso.oc.kyoto-u.ac.jp/visa/about/en)

- **Those who are already in Japan**
  Successful candidates who are already in Japan with a resident status other than Student status (Ryugaku) must change their current resident status to Student status (Ryugaku).

Residence Card
A residence card will be issued to newly arrived foreign nationals who intend to reside in Japan for a period beyond 3 months of their arrival. For those who are arriving at New Chitose, Narita, Haneda, Chubu, Kasai, Hiroshima, and Fukuoka Airports, the residence card will be issued after the immigration examination. For those who are arriving at airports other than those mentioned above, the card will be sent to their address after submitting a Notification of Place of Residence to their municipal office. International residents are required by law to carry their residence card at all times.

Notification of Place of Residence (Resident Registration)
All foreign nationals who intend to stay in Japan for a period of over 3 months of their arrival must register their place of residence at their local City/Ward Office within 14 days of moving into their new place of residence.

National Health Insurance
All foreign nationals residing in Japan for the mid-to long term (over 3 months) are required to be covered by one of the Japanese public medical insurance programs. For students, the most common and highly recommended option is to join the National Health Insurance (NHI). Students with a “Temporary Visitor Visa” or a “Student Visa (with a 3-month period of stay)” will not be eligible for the NHI, and are highly encouraged to buy a travel insurance policy (or other similar policy) before coming to Japan.

Applications are accepted at the City/Ward Office Health Insurance Department after completing the Resident Registration. Subscribers need only pay 30% of medical costs upon presentation of their National Health Insurance Card at the hospital reception prior to receiving treatment. The insurance premium varies depending on individual circumstances such as the number of their family members. The yearly fee is approximately 18,000 JPY for unmarried international students living in Kyoto City.

Work Permit
International students are allowed to have a part-time job provided they receive “Work Permit” in advance from the immigration bureau. They must follow the terms below.

1. The part-time job must not interfere with academic work.
2. The maximum hours of work for “Student Visa” holders is 28 hours per week (during summers and other long vacations, this is extended to allow up to 8 hours of work per day, within the confines of the legal 40-hour work week).
3. The job must not affect public order and morals (for example, sex-related industry employment is forbidden).
4. It is forbidden for students on a leave of absence from the university to engage in part-time work.

*Working without permission will incur a penalty.*
Scholarships for Privately-Financed International Students

The application process for scholarships from private foundations varies. Some can be made directly by the individual students, and some must be made through the applicant’s university. Applications are generally accepted following admission to the university. (A few scholarships accept pre-entrance applications from prospective students who have already passed the entrance examination and are intending to enter the university.) Application information will be posted on our Information System or on bulletin boards for currently enrolled students. Please note that many of these scholarships require applicants to have a certain level of Japanese language ability and are highly competitive (ref.P.21).

Campuses

Kyoto University consists of three campuses: Yoshida, Uji, and Katsura, as well as a number of facilities located across Japan.

1. **Yoshida Campus**
   The Yoshida Campus has been at the core of the university’s activities since its founding. In particular, the main campus is home to structures of varying architectural styles, ranging from brick buildings dating back to the time of the institution’s establishment to modern laboratory buildings.

2. **Uji Campus**
   The site of the Uji Campus came into the possession of Kyoto University in 1949. Uji Campus, where the university’s natural science and energy research facilities are located, hosts many state-of-the-art laboratories engaged in the development of cutting edge science and technology.

3. **Katsura Campus**
   Katsura Campus is Kyoto University’s third campus opened in October 2003. This campus aims to merge technology and science disciplines to form a “Techno-Science Hill.”

Attractions and Life in Kyoto

Life in Kyoto, Japan’s Ancient Former Capital

Kyoto University has three main campuses in Kyoto City, a cultural rich city with a history stretching back over 1,200 years. Enclosed on three sides by mountains, the city’s unique climate allows students on Kyoto University’s three main campuses to experience changing of the seasons in a rich natural setting. Through studying in Kyoto and becoming familiar with the city and its culture, students will gain a deep understanding of Japan as a whole, and will also gain new insights into their own cultural identity. Experience of life in Kyoto is a valuable cultural experience for those seeking to broaden their horizons and be active in international society.

A Rich Cultural Heritage

Many of Kyoto’s historic locations, including several of its approximately 2,000 shrines and temples, have been classified as UNESCO World Heritage Sites. In addition to its many cultural assets, the city also boasts beautiful natural scenery. These qualities have long inspired Kyoto’s rich academic culture, including that of Kyoto University itself. In Kyoto, a rich cultural heritage imbues almost every aspect of life. The local cuisine exemplifies washoku—Japan’s traditional cuisine, which was recently added to UNESCO’s Representative List of the Intangible Cultural Heritage of Humanity. Students and researchers living in Kyoto will find their work and study enriched and inspired by the unique qualities of its four distinctive seasons, and the historically rich cultural environment which surrounds them.

Weather in Kyoto

Kyoto has four seasons. Summers are hot and winters are cold. The temperature can be over 35 °C in summer and below 0°C in winter. The climate is comfortable in spring and fall. Many people enjoy watching the cherry blossoms and foliage. From June to July, it is the rainy season in Kyoto.
