

Subsidiary Facilities

Divisions / Fields / Departments

化学研究所 (ICR)

Institute for Chemical Research

Research into the theory and application of specialized chemistry fields.

Advanced Research Center for Beam Science
International Research Center for Elements Science
Bioinformatics Center

Synthetic Chemistry
Materials Chemistry
Biochemistry
Environmental Chemistry
Multidisciplinary Chemistry

人文科学研究所

Institute for Research in Humanities

Integrated research on cultures and societies around the world.

Center for Informatics in East Asian Studies
Research Center for Modern and Contemporary China

Cultural Research Methodologies
Cultural Processes
Cultural Interrelationships
Cultural Representation
Cultural Composition

再生医科学研究所

Institute for Frontier Medical Sciences

Research into the theory and application of regenerative medicine relating to the regeneration of body tissues and organs.

Laboratory of Animal Experiments for Regeneration
Research Center for Nano Medical Engineering

Biological Function
Tissue Engineering
Regeneration Control
Clinical Application
Stem Cell Research

エネルギー理工学研究所 (IAE)

Institute of Advanced Energy

Research for the advancement of energy generation, conversion, and utilization.

Laboratory for Complex Energy Processes

Advanced Energy Generation
Advanced Energy Conversion
Advanced Energy Utilization

Subsidiary Facilities

Divisions / Fields / Departments

生存圏研究所

Research Institute for Sustainable Humanosphere (RISH)

Research into humanosphere sciences and the development of human resources.

Center for Exploratory Research on Humanosphere
Department of Collaborative Research Programs

Diagnostics and Control of the Humanosphere
Strategic Research of the Humanosphere
Creative Research and Development of Humanosphere

防災研究所

Disaster Prevention Research Institute (DPRI)

Research into disaster sciences and comprehensive studies for disaster prevention.

Research Center for Disaster Reduction Systems
Research Center for Earthquake Prediction
Sakurajima Volcano Research Center
Research Center on Landslides
Research Center for Fluvial and Coastal Disasters
Water Resources Research Center

Disaster Management for Safe and Secure Society
Earthquake Disaster Prevention
Earthquake Hazards
Geohazards
Atmospheric and Hydrospheric Disasters

基礎物理学研究所

Yukawa Institute for Theoretical Physics (YITP)

Research into theoretical physics, including particle physics and other areas of basic physics.

High Energy Physics
Nuclear Physics
Astrophysics & Cosmology
Condensed Matter Physics

ウイルス研究所

Institute for Virus Research (IVR)

Research into viruses, scientific principles relating to virus research, and the prevention and treatment of viral diseases.

Center for Human Retrovirus Research
Experimental Research Center for Infectious Diseases
Center for Emerging Virus Research

Viral Oncology
Genetics and Molecular Biology
Biological Responses
Cell Biology

経済研究所

Kyoto Institute of Economic Research (KIER)

Comprehensive research into industry and economy.

Research Center for Economics of Complex Systems
Center for Advanced Policy Studies

Economic Information Analysis
Economic Institution
Strategic Economic Studies
Finance

数理解析研究所

Research Institute for Mathematical Sciences (RIMS)

Comprehensive research into mathematical sciences.

Computer Laboratory

Fundamental Mathematics
Infinite Analysis
Applied Mathematics

原子炉実験所

Research Reactor Institute (KURRI)

Research into nuclear science and engineering, and the utilization of experimental nuclear reactor facilities.

Particle Radiation Oncology Research Center
Research Center for Safe Nuclear System

Nuclear Science and Engineering
Material Science
Radiation Life Science and
Radiation Medical Science

霊長類研究所

Primate Research Institute (PRI)

Comprehensive research into primate studies.

Center for Human Evolution Modeling Research
Center for International Collaboration and
Advanced Studies in Primatology (CICASP)

Evolution and Phylogeny
Ecology and Social Behavior
Behavioral and Brain Sciences
Cellular and Molecular Biology

Subsidiary Facilities

Divisions / Fields / Departments

東南アジア研究所

Center for Southeast Asian Studies (CSEAS)

Comprehensive research into Southeast Asian studies.

- Integrated Area Studies
- Human-Nature Dynamics
- Socio-Cultural Dynamics
- Economic and Political Dynamics
- Area Studies I
- Area Studies II
- Area Studies III
- Southeast Asian Documentation

iPS細胞研究所

Center for iPS Cell Research and Application (CiRA)

Research into the theory and application of sciences relating to iPS cells.

- Reprogramming Science
- Cell Growth and Differentiation
- Clinical Application
- Fundamental Cell Technology
- iPS Cell of Ethics

World Premier International Research Center Initiative

物質—細胞統合システム拠点

Institute for Integrated Cell-Material Sciences (iCeMS)

Research in the new interdisciplinary field of integrated cell-material science.

- Center for Meso-Bio Single-Molecule Imaging (CeMI)
- Chemical Screening Center

- Material for Cell Control
- Cell-Inspired Materials
