UNIVERSITY FACILITIES

INTERNATIONAL HOUSES

In order to facilitate international education and research exchanges, Kyoto University has established three International Houses: housing facilities for students and researchers from overseas.

The International Houses are not simply housing facilities; they also serve as sites for interaction and exchange between the international students and researchers, university associates and the people of Kyoto.

The three Kyoto University International Houses are located in Shugakuin, Uji, and Ohbaku.

KYOTO UNIVERSITY LIBRARY

The Kyoto University Library was established over 100 years ago in 1899. The library is continually expanding its collection, which currently stands at approximately 880,000 books and 24,500 periodicals. In addition to regular printed material, the library also acquires other types of publications and media such as e-journals, data bases and audiovisual materials (available in the Media Commons), ensuring that it continues to be an up-to-date store of academic knowledge. Various services are also offered on-line.

(The total collection of all libraries on Kyoto University's campuses, including faculty and departmental libraries, amounts to 6,228,000 books and 89,000 periodicals).

UNIVERSITY HOSPITAL

Kyoto University Hospital was established in 1899 as a part of Kyoto Imperial University. With the incorporation of the Chest Diseases Research Institute in April of 1998, the University Hospital became a general hospital with multiple departments, offering top-level medical services to people in and around Kyoto. The hospital currently has 1,182 beds. As of 2006, inpatients number approximately 371,000 and outpatients approximately 602,000.

In April 2001, the Translational Research Center was established to undertake research into fundamental transplants in humans. In January 2003, the Post Graduate Clinical Education Center was established for medical trainees to broaden their understanding of primary medical care, and to acquire and develop a holistic attitude towards the treatment of patients.

In April 2005, the Post Graduate Clinical Education Center became the Integrated Clinical Education Center, a center which trains and educates not only clinicians and dental practitioners, but also nurses, pharmacists and other medical professionals.

The hospital began a program of living-donor liver transplantations in 1990. As of June 2004, over 1000 living-donor liver transplantations have been performed, setting a world record. About 40% of all such transplantation operations in Japan have been carried out at Kyoto University Hospital, making it a world leading facility in that field.

JAPANESE NOBEL PRIZE LAUREATES
